UAWiFi Setup on Windows 8.1

Go to your Network lists on your Windows task bar using the wireless icon:

Select the network option for UAWiFi.
Put in your credentials for UAWiFi, your NetID and password. Your NetID is essentially the username for your university account, it can be found at the beginning of your email (example: netid@email.arizona.edu).
Select **Connect** when you receive this message, this is to trust all of the security certificates UAWiFi needs in order to connect successfully.
