There are two methods of connecting to the VPN client with NetID+ using the Duo Mobile App. Select the method that best fits your needs or circumstances.

- Method 1
- Method 2

**Method 1**

With Method 1, you will use the Duo Mobile App on your smartphone or tablet to generate a one-time passcode that will be entered as your second factor of authentication.

1. Open **Cisco AnyConnect Secure Mobility Client**. Using the dropdown menu, select **UASSL-2Factor/Duo**. Click **Connect**.

2. The following screen will open:
3. Open **Duo Mobile app** on your Smartphone or Tablet. Tap the **Key** symbol.

4. A 6-digit number will be generated and appear on your screen:

5. Enter NetID **Password**, and the **Passcode** from your device into the **NetID+ Method** field, and Click **OK**.
6. The following screen will appear. Click Accept.

7. The following screen confirms that you are connected to Cisco AnyConnect Secure Mobility Client.

**Method 2**
With Method 2, you will use the “Push” option of the Duo Mobile App on your smartphone or tablet for your second factor of authentication.

2. The following screen will open:
3. Enter NetID Password, type push into the NetID+ Method field, and Click OK.
