Open Cisco AnyConnect Secure Mobility Client. Using the dropdown menu, select **UASSL-2Factor/Duo**. Click **Connect**.

The following screen will open:

Enter NetID **Password**, and the **Passcode** from your device or from previously printed bypasscodes into the **NetID+ Method** field, and Click **OK**.
4. The following screen will appear. Click **Accept**.

5. The following screen confirms that you are connected to **Cisco AnyConnect Secure Mobility Client**.
