Configuring Outlook 2010

For IMAP Connections

VERSION 2.0
Configuring Outlook 2010 for IMAP Connections Overview

Like most email clients, Outlook offers several methods to connect to an email account. While we highly recommend that all users employ the Exchange option for connecting to their accounts whenever possible, some may have a reason to use IMAP. Be aware that using IMAP to connect to your email account will only give you access to your email; an IMAP connection will not allow you to view your UAConnect calendar.

These are the steps to follow to configure Outlook 2010 to connect to your email using IMAP:

**Step 1:** Configure the Account Settings in Outlook 2010  Pg. 3
**Step 2:** Subscribe to IMAP folders (Optional)  Pg. 8

**Step 1: Configure the Account Settings in Outlook 2010**

- Open Outlook. By default, the program will open to the **Home** tab. Click the **File** tab.

![](image1.png)

- Click the **Add Account** button.

![](image2.png)
• In the **Add New Account** dialog box, fill in the **Your Name**, **E-mail Address**, **Password**, and **Retype Password** text boxes.
  
  o The email address will be in the format of *your_netid@email.arizona.edu*.
  
  o The password will be your UA NetID password.

![Add New Account](image)

• Click the **Manually configure server settings or additional server types** radial button. Click the **Next** button.

![Add New Account](image)
- Leave the radial button for **Internet E-mail** selected. Click the **Next** button.

- The **Internet E-mail Settings** window will appear with the **Your Name**, **E-mail Address**, and **User Name** fields already completed.
In the Server Information section, click the arrow in the Account Type drop down menu and select IMAP.

```
Server Information
Account Type: IMAP
Incoming mail server: mail.catnet.arizona.edu
Outgoing mail server (SMTP): smtpgate.email.arizona.edu
```

- Fill in the Incoming mail server and Outgoing mail server (SMTP) text boxes.
  - Incoming mail server: mail.catnet.arizona.edu
  - Outgoing mail server: smtpgate.email.arizona.edu

In the Logon Information section, fill in the Password text box with your UA NetID password. The User Name text box should already contain your UA NetID.

- Click the More Settings… button.

- On the General tab, the account name will already be filled in with your email address. If you wish, change this to something of your choice. The name in this box will identify this account on Outlook’s Home tab and in the Account Settings box.
• Click the **Outgoing Server** tab. Check the **My outgoing server (SMTP) requires authentication** check box.

• Click the **Advanced** tab. In the **Server Port Numbers** section, set the incoming server port and encryption. By default, these are set to 143 and None.
  - **Incoming server (IMAP)** port text box: 993
  - **Use the following type of encrypted connection** drop down menu: SSL
- In the same section, set the outgoing server port and encryption. By default, these are set to 25 and None.
  - **Outgoing server (SMTP)** port text box: 465
  - **Use the following type of encrypted connection** drop down menu: SSL

![Internet Email Settings](image)

- Click the **OK** button.
- Click the **Next** button.
- Outlook will automatically test your settings. If the setup was successful, it will indicate that a connection was made to the incoming server and a test message was sent. Click the **Close** button.

![Test Account Settings](image)

- Click the **Finish** button.
Step 2: Subscribe to IMAP folders (Optional)

By default, Outlook will only show the following folders when using an IMAP connection: Inbox, Deleted Items, Junk E-Mail, Search Folders, and Sent Items. If you have other folders on the server, they will not show up in Outlook’s folder list until you subscribe to them. You can subscribe to IMAP folders after following the steps to configure your account. Use the steps below to subscribe to folders.

- Click the Folder tab on the ribbon.
- Click the IMAP Folders icon.
- In the IMAP Folders dialog box, click the Query button.
- All of your IMAP folders will appear in the Folders list.
• Click the folders you wish to subscribe to, and then click the **Subscribe** button. If you have subfolders, you must subscribe to the subfolders as well as to their parent folders. The folders you have already subscribed to will have folder icons next to their names.
  
  o If you wish to subscribe to more than one folder, click on the first one. While holding down the control (Ctrl) key, click on additional folders. The folders you have clicked on will be highlighted.
  
  o If you wish to subscribe to all of your folders, click the first one. While holding down the Shift key, scroll to the bottom and click on the last folder. The two folders you clicked on, as well as all folders in between, will be highlighted.

![IMAP Folders](image)

• Click the **OK** button.

• On the **Folder** tab, click the **Update Folder List** icon.
