Finding your MAC address on Ubuntu Linux 12+

1. Open up your Dash by clicking on the icon at the top left of your screen.

2. Once your Dash is open type in `terminal` and click on the Terminal application.
3. Once your terminal opens, type in the command `ifconfig -a`. Locate the section `eth0` and find the **HWaddr**. This will be your MAC address.

For further questions contact the 24/7 IT Support Center at (520) 626-8324 or submit a support request at [https://uassist.arizona.edu](https://uassist.arizona.edu). Please note that support requests can take up to 48 hours for a response.
